FEATURES
Option K

With this option, the wet-end is made completely from stainless steel and finished with transparent coating. All components coming into contact with the fluid to be pumped are therefore made of high-quality 316 stainless steel.

- Pump casing
- Impeller
- Wear plate
- Pump shaft
- Float box
- Discharge module
- Non return valve

Option KII

With this option, the following components of the relevant pump are made from high-quality 316 stainless steel.

- Impeller
- Wear plate
- Pump shaft

On request

- Secondary float box
- Material certificate 3.1
- Connections made of 316 stainless steel
- Gaskets and rubbers made of special materials
- Float box fitted with manual valves
- ATEX certified pumps and/or pumpsets
